Tarp System Innovation
Since 1944

Easy Pull®

Quality & Dependability

A Simple, Low-Cost Solution

The Easy Pull® is a manual tarp system that is economical and simple to operate with the quality and dependability you expect from Aero®. The Easy Pull Tarp is built with the same attention to durability and productivity you'll find in all Aero products.

- Tarp system comes completely assembled for easy installation
- Available in various widths and lengths to fit any dump body
- Mounting strips are used to create a tight seal between the dump body and the tarp housing
- Extruded aluminum roller rewinds tarp quickly and easily
- Strong, extruded aluminum rear pull bar
- Lifetime warranty on spring*
*Subject to warranty terms

Mounting Options

The system can either be mounted on top of the cab shield or below

Cab Shield

Body Mounting

Mounting Strips

The tarp housing is firmly attached to the body of the trailer using mounting strips which saves valuable time for fast, easy installation, available in both aluminum and stainless steel.

Tarp Housing

Both steel or aluminum tarp housings are available.

Steel

Aluminum

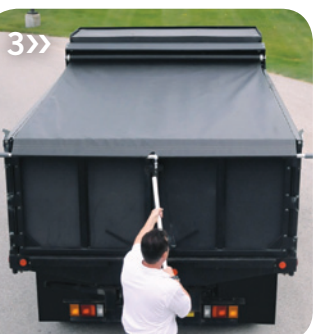

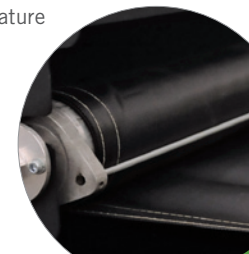

Spring Assembly

The spring within the aluminum roll-up tube provides tension for the tarp as it is opened and closed.

Length-Lock™

Innovative feature allows you to adjust the tarp length.

Heap Hopper

Lifts the tarp system up and over heaped loads.

PRE-ASSEMBLED SHIPPING allows for fast, easy installation.
