

MDV Auger

Medium Duty Hydraulic Auger V-Box

IT'S WHAT WE KNOW.

Efficient and effective performance featuring independent electric drives.

MDV series spreaders are designed to be mounted in a dump bed or on a flatbed truck, utilizing the 15,000 to 20,000 pound rated vehicles to stay below the federal CDL requirements. Swenson's Medium Duty Hydraulic Auger V-Box is designed with extra capacity for the demands of the heavy-duty user in mind. Less trips to the salt pile are now possible with an increased profitability and performance. The new and improved auger conveyor system enhances spreader pattern by providing consistent material flow to the spinner. When looking for performance needs, think Swenson's MDV Auger.

SWENSON

IT'S WHAT WE KNOW.

MDV Auger

Medium Duty Hydraulic Auger V-Box

Full length 6" auger

Swing up spinner

Features

Optional side extensions for increased capacity.

All auger and spinner bearing maintenance can be performed from the back of the unit.

Baffles for controlled spreading.

MDV Auger Specifications

Highlights

- ▶ Inverted V forming located over the auger reduces the load on auger and helps prevent tunneling
- ▶ 24" tall spinner frame provided positions disc closer to ground to reduce amount of material striking other vehicles
- ▶ Durable 13" polyurethane disc for greater life and improved spread pattern
- ▶ 2 adjustable internal spinner baffles to adjust spread pattern from left to right, 3 adjustable external spinner baffles to restrict size of spread pattern
- ▶ Recommended for straight salt

Equipment

Size Specifications:	Width: 70"; Length: 8', 9', 10'; Height: 44"
Capacity:	Available in 3.0 to 4.5 cu yds
Construction:	Non corrosive, non magnetic stainless steel
Spread Width:	4' to 40' spread pattern
Auger Size:	6" with double pitch
Safety Features:	Drop-N-Loc screens, fork pockets, hydraulic interlock system
Warranty Details:	One year warranty
Options:	Truck harness kit, side extensions, extended power chute, 10" spill shield, vibrator kit
